8 To help achieve long-term investment and insurance goals one benefits from careful consideration of structuring a well-balanced and diversified investment portfolio. Diversification is not a guarantee against loss, but it may be a useful strategy in your management of investment risk. It is also important to periodically review your investment objectives and your investment portfolio, including the Investment Options under the Contract, to help further your investment and insurance goals. The Chart provides an overview of your allocations by asset category.

A complete listing of all Investment Options may be viewed on the Performance Center at www.jackson.com. Current information on your Investment Option allocations is available by signing into your online account. The Investment Options' asset categories are: *U.S. Equity, International/Global Equity, Allocation, Sector Equity, Fixed Income, Alternatives, and Fixed Account Options.*

The risks of allocations to each of the Investment Options under these asset categories will include the usual risks of equity and fixed income securities, and the general economic and market conditions affecting domestic and international investments. Thus, the Investment Options under asset categories invested in positions that emphasize alternatives or nontraditional asset classes or investment strategies are subject to the additional risk factors of those asset classes and strategies.
