Important Information and Disclosures

***** Please review your statement carefully and notify our Service Center of any potential error within 30 days. *****

1 This is a cumulative value since the Issue Date.

2 When the quarter ends on a Non-Business Day, Automatic Transactions scheduled to process at the end of the quarter will process on the next Business Day and be reflected on your next quarterly statement. In addition, daily Interest on Guaranteed/Fixed Account Options for Non-Business Days at the end of the quarter will be reflected in your Contract Value on your next quarterly statement.

3 The Guaranteed Annual Withdrawal Amount and the Remaining Guaranteed Amount Available For Withdrawal This Contract Year are not determined until the first withdrawal is made from the Contract.

4 If you send us additional Premium it will be allocated as indicated unless changed by you.

5 The Withdrawal Value is the amount paid upon termination of the Contract as of the date of the Statement.

6 The Interest Rate/Excess Interest/ Market Value Adjustment may fluctuate and could either increase or decrease the Guaranteed/Fixed Account Contract Value at some future date.

8 To help achieve long-term investment and insurance goals one benefits from careful consideration of structuring a well-balanced and diversified investment portfolio. Diversification is not a guarantee against loss, but it may be a useful strategy in your management of investment risk. It is also important to periodically review your investment objectives and your investment portfolio, including the Investment Options under the Contract, to help further your investment and insurance goals. The Chart provides an overview of your allocations by asset category.

A complete listing of all Investment Options may be viewed on the Performance Center at www.jackson.com. Current information on your Investment Option allocations is available by signing into your online account. The Investment Options' asset categories are: *U.S. Equity, International/Global Equity, Allocation, Sector Equity, Fixed Income, Alternatives, and Fixed Account Options.*

The risks of allocations to each of the Investment Options under these asset categories will include the usual risks of equity and fixed income securities, and the general economic and market conditions affecting domestic and international investments. In addition, there are varying additional mixes of risk of each of the Funds underlying the Investment Options under these asset categories. Thus, the Investment Options under asset categories invested in positions that emphasize alternatives or nontraditional asset classes or investment strategies are subject to the additional risk factors of those asset classes and strategies. These risks can offset the benefits of diversification. See the product prospectus and the prospectuses for the underlying Funds.

The Accelerated Withdrawal Period is the period during which you are guaranteed to be able to take annual withdrawals based upon the Accelerated GAWA%, even if the Contract Value has reduced to zero. The Accelerated Withdrawal Period begins on the date that the GAWA% is first determined and is guaranteed to run until the later of the tenth (10th) Contract Anniversary following 1) determination of the GAWA% or 2) the latest Step-Up that resulted in an increase in GAWA. The Accelerated Withdrawal Period continues to run whether or not you take withdrawals during Contract Years during the period.

Earnings-Sensitive Adjustment
An amount that the Owner/Joint Owner may be allowed to withdraw each Contract Year in addition to the GAWA (or Required Minimum Distribution) while still keeping the Guaranteed Minimum Withdrawal Benefit fully effective.
